

# Temporary Air Carrier Supplement Pricing

The impact of the coronavirus has led to shortages in air capacity and to an escalation of air carrier costs of as much as fivefold to some countries. In order to manage these increased costs as fairly as possible, we have introduced an Air Carrier Supplement, which will be charged on the current rate card price per kilo (except Australia and New Zealand where the addition should also be added per item and per kilo). This supplement will be regularly reviewed to reflect changing air carrier costs to the affected countries/zones for Business Contract products. There is no margin applied to this supplement. This covers the increased costs we are experiencing.
